

**WHAT ARE THE DIRECTIONS FROM HERE?
HOW DO WE BUILD AN EVEN BETTER SCHOOL?**

- There is an alumni link to the school's Facebook page and alumni have their own page.
- Do a better job of helping students apply and be accepted into post-secondary schools.
- Harbour updated our transition program to include more parent participation and more cross-subject area involvement

HERE'S LOOKING FORWARD TO 45 YEARS!

CONCLUSION

At The Harbour School we believe in the law of physics that nothing stays the same. We either get better or not. We are definitely committed to getting better. The Harbour School has just started its 44th year as a school. We have achieved a great deal. And there is much left to do.

We are participating in a State pilot program to improve our transition services. Graduates now leave with a full employment online portfolio to assist in securing employment and/or post-secondary education. We need to continue to work with families on the benefits of soft-skill training. It is these skills that keep our students both in college or on the job.

We believe that our fledgling birds will fly further and faster if they are not only well fed; but also have a clear focus on where they are going and the real challenges that lie ahead. Artificial intelligence will change the workplace. It is not clear yet in what specific ways and how those ways will impact our graduates. The school is going to assess how that workplace has changed. Working from home presents challenges for many of our alumni since they often require in-person supervision.

On the positive side, our alumni often get service sector jobs and there are many openings in those areas with increased hourly wages and benefits. The huge cut in federal employment has deeply impacted our students. They are often low-lying fruit and easy pickings for managers who want to cut jobs. Our alumni are not immune from these challenges and the school will need to adjust our programming to meet those challenges.

We are a fine, fine school with fine, fine students and fine, fine teachers- it is no wonder we all just love this school.

	Medical Assistant-Sunrise Senior Living

2025 GRADUATE OUTCOME SURVEY

2025 GRADUATE OUTCOME SURVEY

Featured Graduate

This year we are honoring Matt Snowden. Matt is a class of 2019 graduate of our Annapolis campus. At 26 years old, Matt is thriving both personally and professionally while continuing to pursue his passion for sports.

During his time at Harbour, Matt participated in Unified Sports with Severna Park High School, an inclusive Special Olympics initiative that brings together students with and without disabilities to compete as teammates. Matt played varsity golf, bowling, and bocce, helping his team capture the 2019 state championship.

After graduation, Matt spent a year in Coeur d'Alene, Idaho in a transition program before returning to Maryland. He now works as a Game Day Assistant at Anne Arundel Community College, where he supports basketball and volleyball games by managing the clock and scoring, keeping balls in play, and helping with set-up and clean-up. He loves being part of the energy of game days and enjoys working alongside student-athletes.

Matt also lives independently in his own apartment, with support nearby from his family.

Golf has remained one of Matt's greatest strengths and passions. A left-handed golfer with a 4-7 handicap, putting him in a category with less than 9% of male golfers in the U.S. Matt is a member of the Naval Academy Golf Club and the Adaptive Golf Alliance, where he continues to shine. In April, he won his division at a tournament, and this fall he is traveling to Sea Island, Georgia for the Adaptive Open. Looking ahead, Matt hopes to qualify for the U.S. Adaptive Open, which will be held in Maryland next year.

From his early days golfing with his dad to competing at a national level, Matt has shown incredible dedication and talent. We are both proud and inspired by all he has accomplished and can't wait to see what he does next!

Read more about Matt Snowden in the July-August edition of Golf Magazine, in an article his sister wrote in the Why We Play section.

Harbour has completed its 43rd year as a school and is well into year #44.

We are already planning for the big Year 45 celebration!

A MESSAGE FROM DR. JACOBS

This past year has seen quite a few capital maintenance and improvement issues. We totally replaced the HVAC systems at our Annapolis campus. We renovated space at the Baltimore campus and created two new classrooms and more one-person bathrooms. We purchased VR systems for each campus.

Harbour now serves approximately 360 students on two campuses. It graduates on average 50 students each year. These are students with a full range of abilities as is obvious as each graduate gives his or her traditional graduation remarks. Yet the self-confidence and poise to give that speech makes clear that these kids will be ok as they leave the protective bubble that is the school. It is the expectation that Harbour will continue to be the "wind beneath their wings" as they move through their adult lives. This annual survey backs that view with hard data.

Matt Snowden, 2019 Harbour School Graduate

HOW MANY GRADS DID WE REACH?

Through June 2025, 801 students have graduated from The Harbour School. Eleven of our alumni are deceased. Five of our graduates are medically unable to work. Through mail solicitation, on-line surveys and follow-up phone calls we were able to reach 554 of our graduates or 70.1%. This is down a bit from last year. This survey goes all the way back to 1991, our first graduating class.

GRADS WORKING AND IN SCHOOL

A total of 82.8% of our grads reported working. This is up from 67% two years ago. This year shows a change from previous surveys. In this survey, the more recent grads were less likely to be working. The impact of the federal job terminations is clear. Many of our alumni seek government jobs for their safety and general non-discrimination in hiring. Not so this year. Alumni in the 1991-2021 classes report that 90.9% are working. The study showed a rise in the number of students in post-secondary from the last survey. Only 31.9% of all grads were in school, but 51.7% of recent grads were in school. Students with disabilities are disproportionately impacted negatively by online instruction and most institutions of higher learning went online during the pandemic. Some of our grads are going back to school, either higher ed or post-secondary job training as employment options dried up and the number of new jobs in our economy is going down.

GRADS LIVING INDEPENDENTLY

According to a 2013 study by Shaun Heasley reported in Disability Scoop, only 17% of people with autism ages 21-25 have ever lived independently. The current majority of our students has autism. Our alumni are also experiencing the trend of their non-disabled peers who seem to be returning to the comfort and low-cost of living with their parents. Even with the current trends, Harbour grads exceed the expected with 33.9% living independently. The huge jump in rental costs has added to this issue. Additionally, the number of funded supported living arrangements is going down as both the State of Maryland and the federal government have dramatically cut support.

MARYLAND RECENTLY RELEASED DATA ON THE EMPLOYMENT OF PEOPLE WITH DISABILITIES IN MARYLAND

These data are not encouraging. In May of 2019, before our survey but also before the pandemic, 22.2% of people with disabilities were engaged in individual competitive employment. Compare this number to 74.7% of Harbour grads. Only 40 people were self-employed, .4%. In the Maryland study the largest percentage was 55% who were engaged in facility based nonwork. Probably some sort of care center. Altogether the study looked at 11,412 people down just over 200 from two years ago. The largest increase was in community based non-work, again probably some sheltered work in the community.

Harbour puts a great deal of emphasis on preparing our students for life after Harbour, whether that be in a job, post-secondary education or both. Some have criticized the school for not emphasizing test scores enough. But until someone can show the school data that correlates post-secondary success with high standardized test score, the school will keep believing in our own data.

HOW DO WE COMPARE:

	THS	MANSEF	NTLS2
# of students:	801	210	12,000
Post-secondary	51.7%	57%	31.9%
Employed	74.7%	53%	48%
Criminal involvement	.2%	13%	Unknown

THE HARBOUR SCHOOL BELIEVES IN OUR STUDENTS AND THEIR FAMILIES. THIS IS WHAT THEY HAVE TOLD US.

- I am currently working two jobs and I'm in school part-time. I'm also still friends with only Harbour School people who I went to school with or who went to school after I graduated. I have the same friend circle that I had at Harbour. We're friends for life.
- I am having difficulty maintaining contact with my friend from Harbour. A pamphlet with the contact information of anyone who is willing to share their contact information and keep in touch would be helpful.
- Thank you! I'll never forget the Harbour staff members who supported me while I was a student.
- I still keep in contact with Dr. Jacobs via email and I cherish this connection. The Harbour School helped me to develop skills to advocate for myself. The high school listened to my concerns and put me in math classes more in synch with my ability. I am proud of my college degree.
- I have been working at GBMC for two years! I am driving as well. I drive myself to and from work every day
- Fun experience, amazing teachers, great friends, learned how to be a cook, life skills to support self and be on my own. Everyone else doubted me-NOT Harbour
- I am in a day program for developmentally disabled adults which includes supported employment on a non-profit community farm. I like doing this work. I also volunteer 1 day a week for a food pantry affiliated with the Maryland Food Bank. When there is a housing placement available in my service providers group homes or apartments, I will move out of my parents' house if there is a good roommate.
- More planning with the transition team. At graduation didn't feel that I had a clear understanding of navigating the adult path and services.
- Harbour did a lot to prepare for the real world.
- Thank you for all your support during my time at Harbour. I do not know where I would be without it
- Provide more specific job training, and perhaps coaching in getting a job.
- If it wasn't for The Harbour School, I would not be living a complete life like I am now. It has helped me more than I can say and I am so grateful for it.
- I have been at Royal Farms for 10 years, have made many friendships there and I love it. I take Uber to and from work which is a service I receive from DDA. I am engaged to a graduate from the Baltimore campus, my life is very full.
- I am a ServSafe certified food manager and a certified food handler also I completed a program in entrepreneurship and have applied for another job

Number of Harbour School grads in post-secondary education, working, or a combination

90.9%

IS THERE ANYTHING YOU WOULD LIKE US TO KNOW, OR YOU WOULD LIKE TO SHARE WITH HARBOUR?

- This past March I got a job as a substitute daycare/classroom aide in "Lower Township Elementary School District" (NJ). I would not recommend "The Workforce and Technology Center to ANYONE!!! I had a terrible experience and I think this place has gotten other bad reviews.
- I have delivered 2 speeches, met with the Board of Directors at Melwood, and landed an internship in the finance department at Melwood
- The Harbour School taught me so much. I made friends and felt safe. I am doing well
- If it wasn't for The Harbour School I don't know what I would be doing. Harbour School was amazing and helped me so much. Mrs. Pickhardt was such an inspiration in my life. She is the one who influenced me to want to work with special needs children. Thank you, Harbour School. Very sadly Mrs. Pickhardt passed away August 2021.
- I got divorced last year. (looks like Harbour grads are not immune from marital problems)
